

EHIGROUP®
CREATING LEGACIES

KARL HESS
Managing Director

{ABOUT US}

Creating Legacies

OVER THE PAST 15 YEARS we have established a reputation for unrivalled service, quality workmanship and attention to detail having completed a vast range of projects for some of the biggest cemeteries and crematoriums in England.

The services we offer include everything from restoration, land acquisition and the reclamation of land to problem solving, coming up with innovative solutions to drainage issues and grave reuse. Since 2009 the additional burial spaces we have created from land reclamations in London alone has generated in the region £35 million of new cemetery revenue.

At every stage of construction we take great care to ensure a flawless experience and exceptional products. Every project we work on begins with an idea and from the initial enquiry to the completion of the project you will work directly with the EH Group® chairman Karl Hess to create your vision.

Our extensive technical background along with our industry knowledge and environmentally responsible construction practises allow us to be creative and innovative, showing a clear understanding of the requirements to each and every project.

By carefully understanding the balance between architecture, landscape and the sensitivities of each project's requirement, we are able to protect the natural character of each and every site.

We also specialise in crypts, vaults and mausoleum design and construction. Each mausoleum build starts with defining the precise needs to create a true legacy.

Our business has grown through building strong, long-standing relationships with clients who value our workmanship, reliability and our attention to detail.

{ABOUT US}

Operating Worldwide

AT EH GROUP® quality is important to us we source specific components and complete end products from around the world to ensure our high standards are met on each and every project we undertake. By operating like this we can provide our UK customers with the opportunity to maintain or increase their profit margins in a competitive market place in the safe knowledge that a considerable amount of time, effort and resource has been invested to ensure the very highest quality product or component has been sourced.

Our products are designed, built and developed to a high standard of British craftsmanship using only the very highest quality products. Designs for our overseas customers are created bespoke for each individual project and all of our products can be developed, shipped and built anywhere in the world.

EH Group® are proud to be British.

EH Group® provides its clients with only the very best quality products with globally competitive prices, strict quality control and peace of mind.

VILLAGE OF REST®

{ABOUT US}

VILLAGE OF REST®

OUR CONFIDENCE COMES FROM OUR COMPANY ETHOS where we refuse to compromise on quality and only source the very best products from reputable manufacturers and suppliers from across the globe.

01 THE PORTOBELLO

Two/three interment single-height mausoleum, constructed from granite with stainless steel channels.

02 THE MAYFAIR®

Twelve interment mausoleum constructed from granite, with stainless steel channels.

03 THE BELGRAVE

Six interment private family walk-in mausoleum constructed from granite, with stainless steel channels and bespoke gated entrance and seating area located within the mausoleum.

04 THE RICHMOND

Two/three interment private family walk-in mausoleum constructed from granite, with stainless steel channels and bespoke gated entrance and seating area located within the mausoleum.

05 BELOW GROUND CRYPTS

EH Group® one, two and three interment concrete crypt. Each complete with removable concrete shelf and landing sections.

06 THE BLOOMSBURY 1, 2 & 3 CRYPT INTERMENT

A bespoke headstone and landing design. This can be constructed from granite, sandstone, marble or concrete and supplied with, or separately from, the below ground crypts.

07 THE VICTORIA 1, 2 & 3 INTERMENT

Above-ground vault constructed from granite with concrete below-ground crypt, either one, two or three interments. These are provided with or without memorial book.

08 LANDSCAPING & CIVIL WORKS

EH Group® is able to provide the complete package. We will undertake DDA compliant paths of all material construction, and landscape with ready grown turf, hedging and flora, so that when the construction process is finished your product will be immediately ready to sell. The entire process is undertaken in-house by ourselves leaving you, the client, only one company to deal with.

3D IMAGERY

EH GROUP® HAS DEVELOPED a three-dimensional programme that enables it to produce a moving flyover of any proposed project. This is of particular benefit for the following reasons:

1. It enables the potential client to see the development through its entirety, at various stages, before the memorials have been built/completed.
2. To sell memorial areas/plots in advance, generating immediate and future income based on the 3D imagery.
3. Assist with board level discussions and give a visual and accurate memorial stock/value to the proposed project.
4. Total understanding between client and EH Group® ie: your expectations and our obligation to accurately deliver this expectation.

{PRODUCTS}

The Mayfair®

THE MAYFAIR® is a bespoke design Victorian style 12 interment mausoleum built to the highest specifications using top quality granite.

The attention to detail on The Mayfair® is exceptional. The ornate marble capitals and hand-polished marble, combined with its unique design, makes this high end premium product stand out from anything else available in the market.

The granite used in the construction of The Mayfair® is sourced from the very best mines around the world and has been carefully selected exclusively for the EH Group® mausoleums.

The Mayfair® is by no means a basic box mausoleum; it is designed for discerning individuals who want a truly unique, custom mausoleum built using the world's finest granites that fulfil the vision and wishes of your family. Our designers can work closely with you to create a unique and elegant building that can be customised with personal touches.

The materials we use in all of our products are chosen for their natural beauty and longevity ensuring every mausoleum we build is creating a lasting legacy.

{PRODUCTS}

The Belgrave

THE BELGRAVE is a six interment walk-in mausoleum designed with the family in mind. The internal seating area and illuminated interior has been sympathetically included into the design to give privacy and comfort and allow for a private mourning area for the family, loved ones and friends, adding a special intimacy like no other product currently available on the market.

The design of The Belgrave can be adapted with solid or gated doors that can open inward or outward, left or right, making it suitable for any space or location.

Our highly skilled design team would be happy to discuss additional changes to the design to ensure this product was hand-crafted to meet the exact needs of the client.

Only the highest quality granite is carefully selected and sent to our master craftsmen for the final carving and polishing where we add the finest and most intricate of detail that makes all of our mausoleums unique. The crafted granite is then carefully transported to the construction site for the final build and installation.

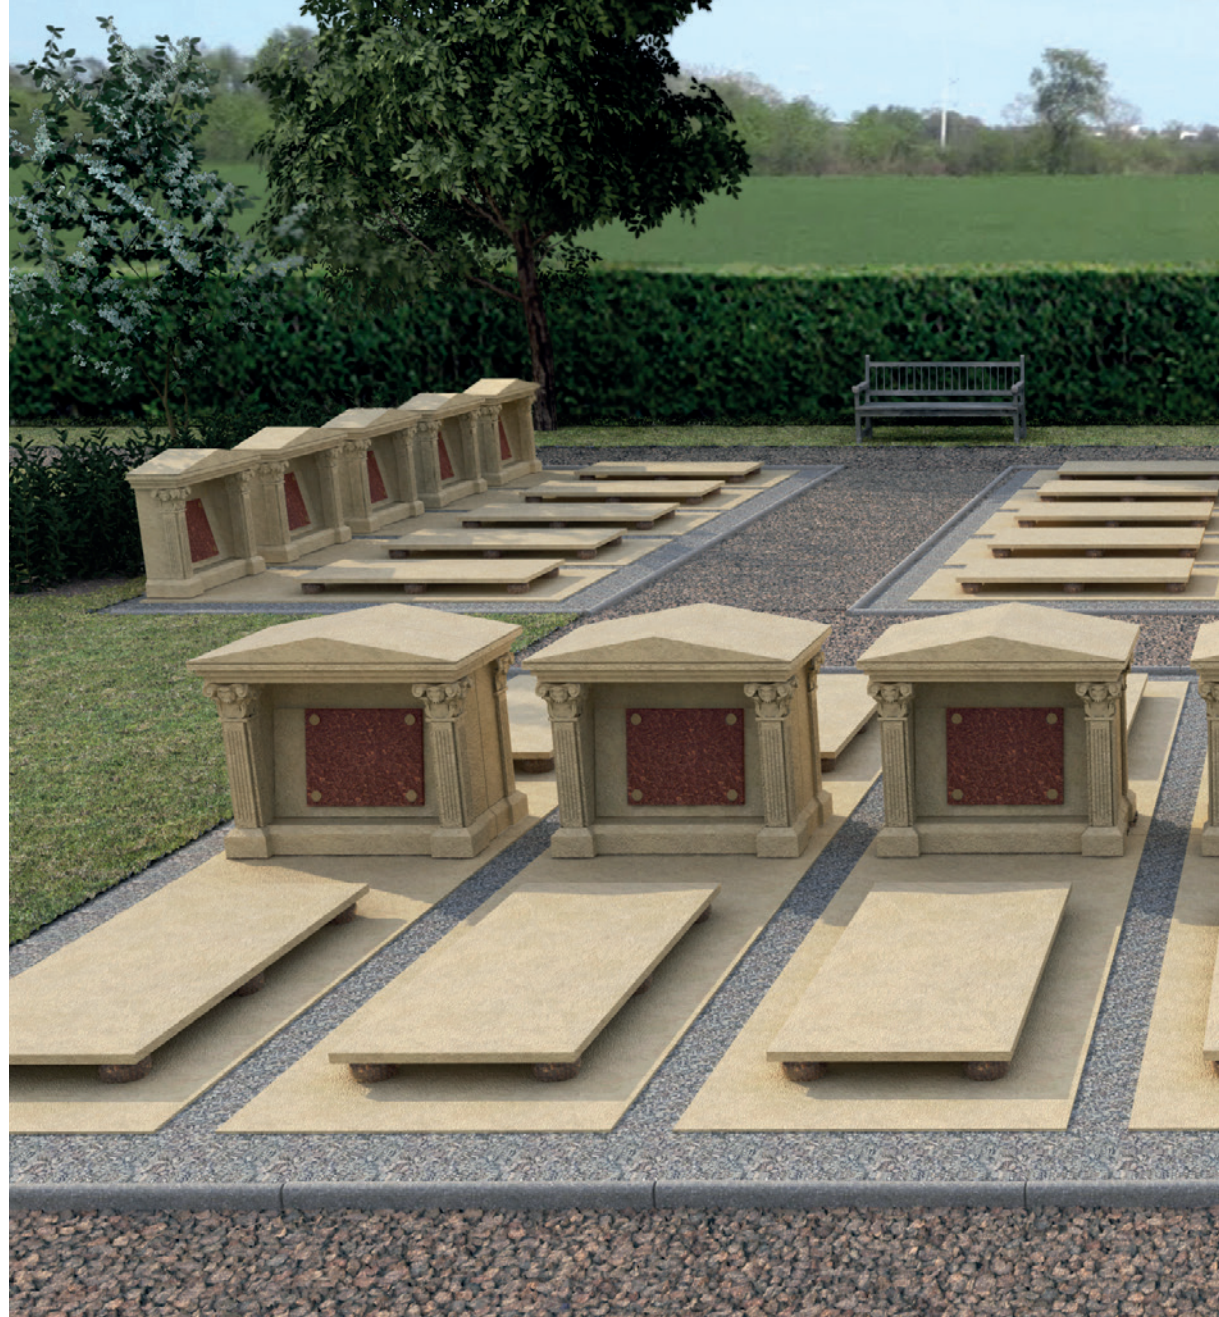

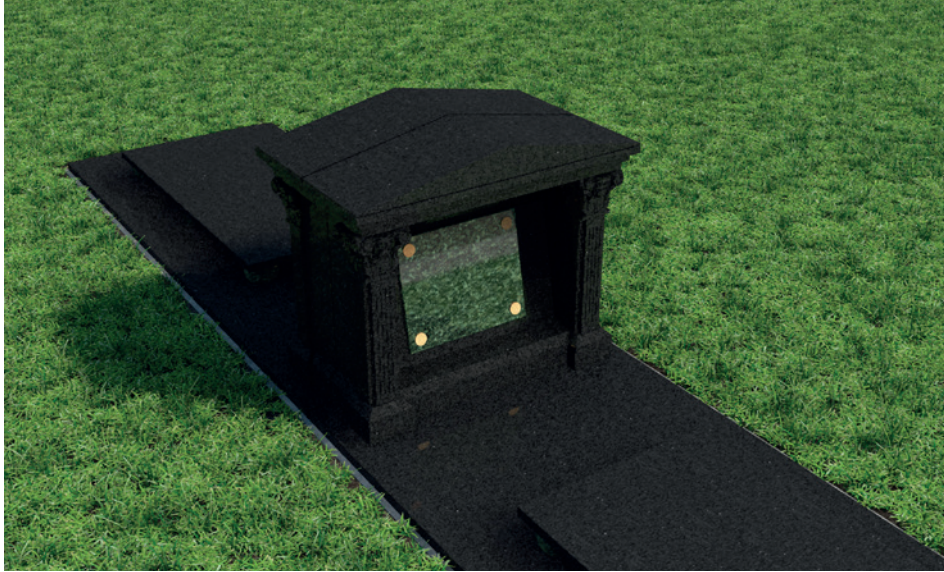

{PRODUCTS}

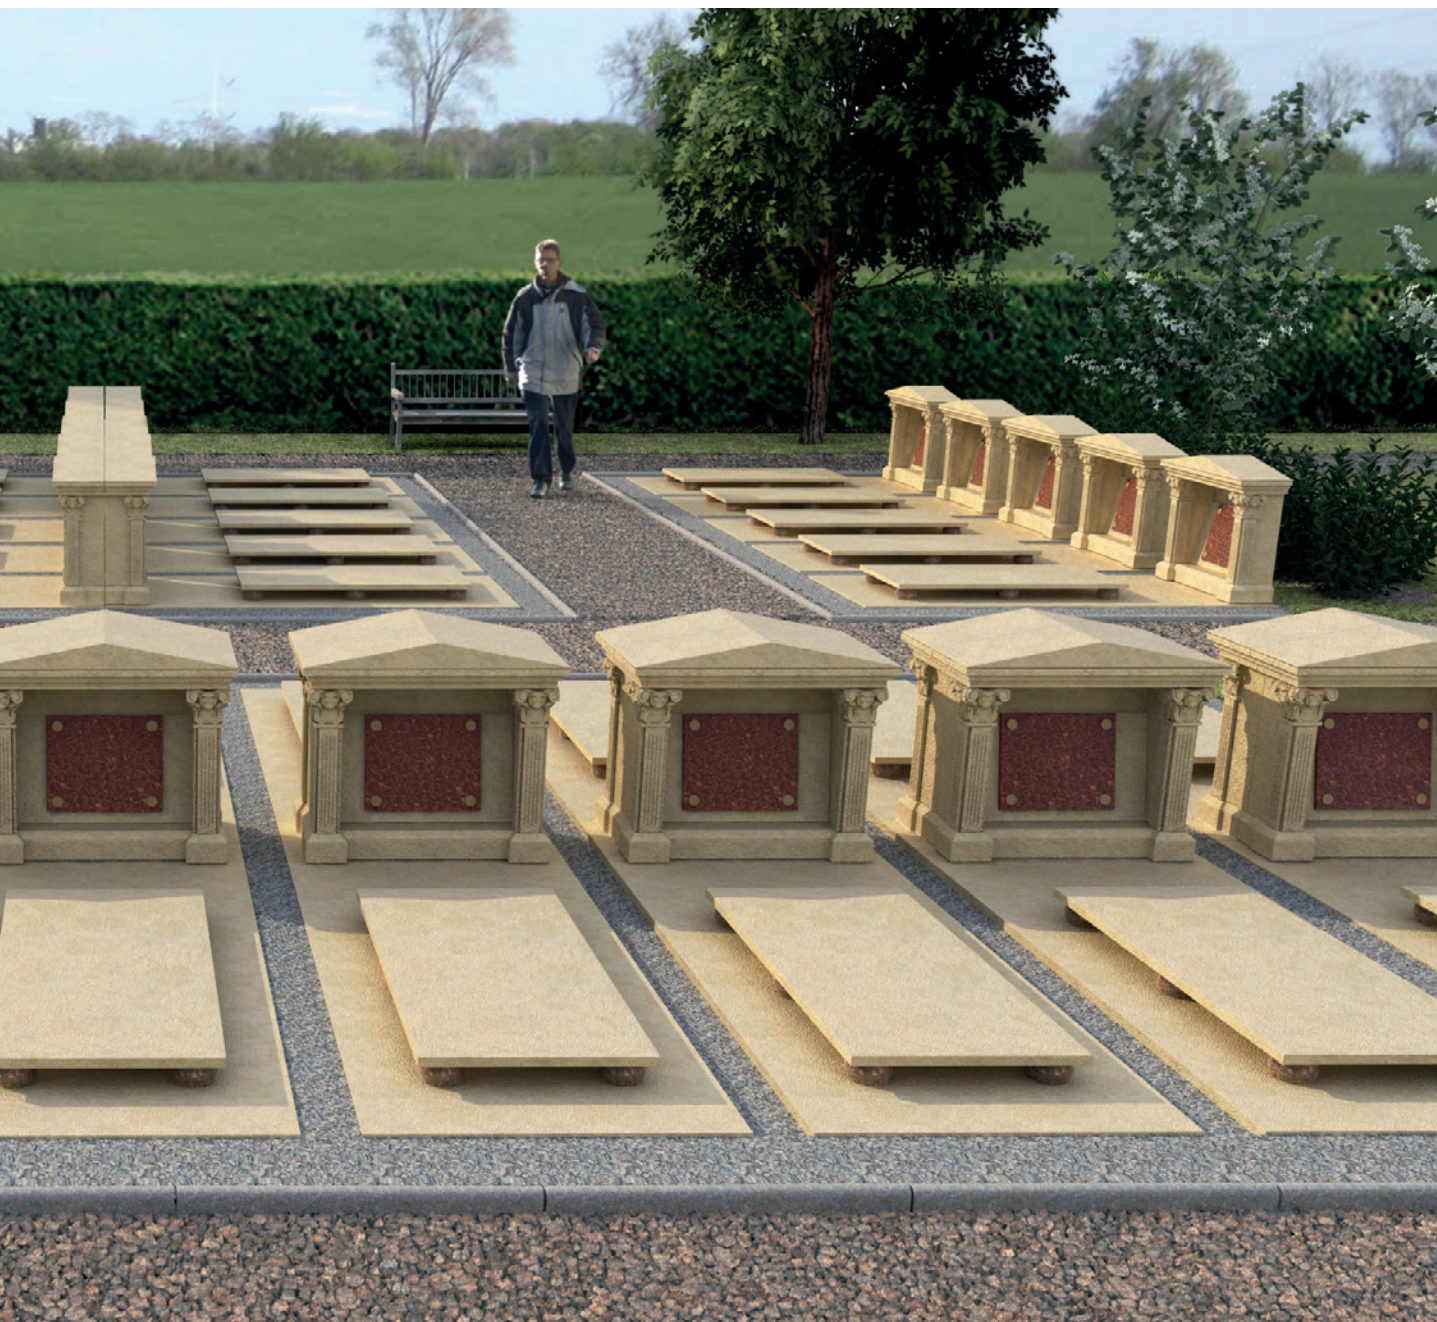

The Richmond

THE RICHMOND is a bespoke two or three interment walk-in mausoleum built to the same high specifications with the same innovation, craftsmanship and quality used in both The Mayfair® and The Belgrave.

The unique design of The Richmond provides a calm and peaceful retreat for the smaller family and is finished to the same high standards expected from an EH Group® product.

Hand-carved ornate cases and urns can be added to create a truly bespoke product of the very highest quality.

{PRODUCTS}

The Bloomsbury

THE UNIQUE DESIGN of The Bloomsbury combined with the high quality materials used in the construction make this product stand out from similar products available on the market.

The Bloomsbury is the result of extensive research and design to create a high end, premium product based on an elegant Victorian style.

The Bloomsbury is built using the very highest quality sandstone source exclusively by EH Group® and is available in a range of colours to meet the exact client's requirements.

Ornate hands-carved capitals are used in the construction, and the Bloomsbury comes complete with a granite panel for memorialisation.

This product is available with one, two or three interments concrete below ground crypts.

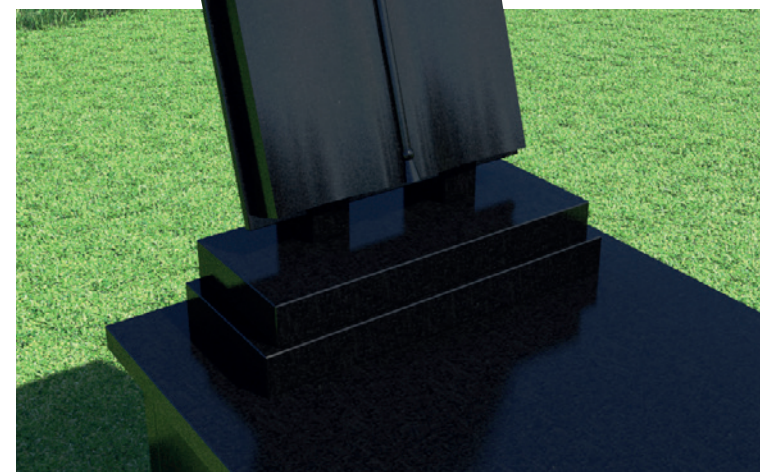

{PRODUCTS}

The Victoria

THE VICTORIA is a single above-ground interment which has been carefully and sympathetically designed and constructed using solid granite.

This product is available with one, two or three interment concrete below-ground crypts.

A hand polished granite memorial book and bespoke lighting can be added to ensure the finished product is personalised to the customer's specifications.

{PRODUCTS}

The Portobello

THE PORTOBELLO is a two/three interment mausoleum built to the same high standards expected from an EH Group® product.

The attention to detail is evident with the use of expertly hand-carved capitals, and the use of only top quality granite all comes as standard in the construction of The Portobello.

Like most of the EH Group® portfolio, design changes can be introduced to meet any client's requirements.

{PRODUCTS}

The Buckingham

THE BUCKINGHAM is the result of a tireless pursuit for excellence and is crafted and expertly finished to the very highest specifications. It is a masterpiece of design and engineering.

Without question The Buckingham 12 interment mausoleum is one of the finest of its kind in the world and is constructed using the very best materials sourced from around the globe.

With the use of hand-carved marble ceilings, hand-carved decorative marble urns, family crest

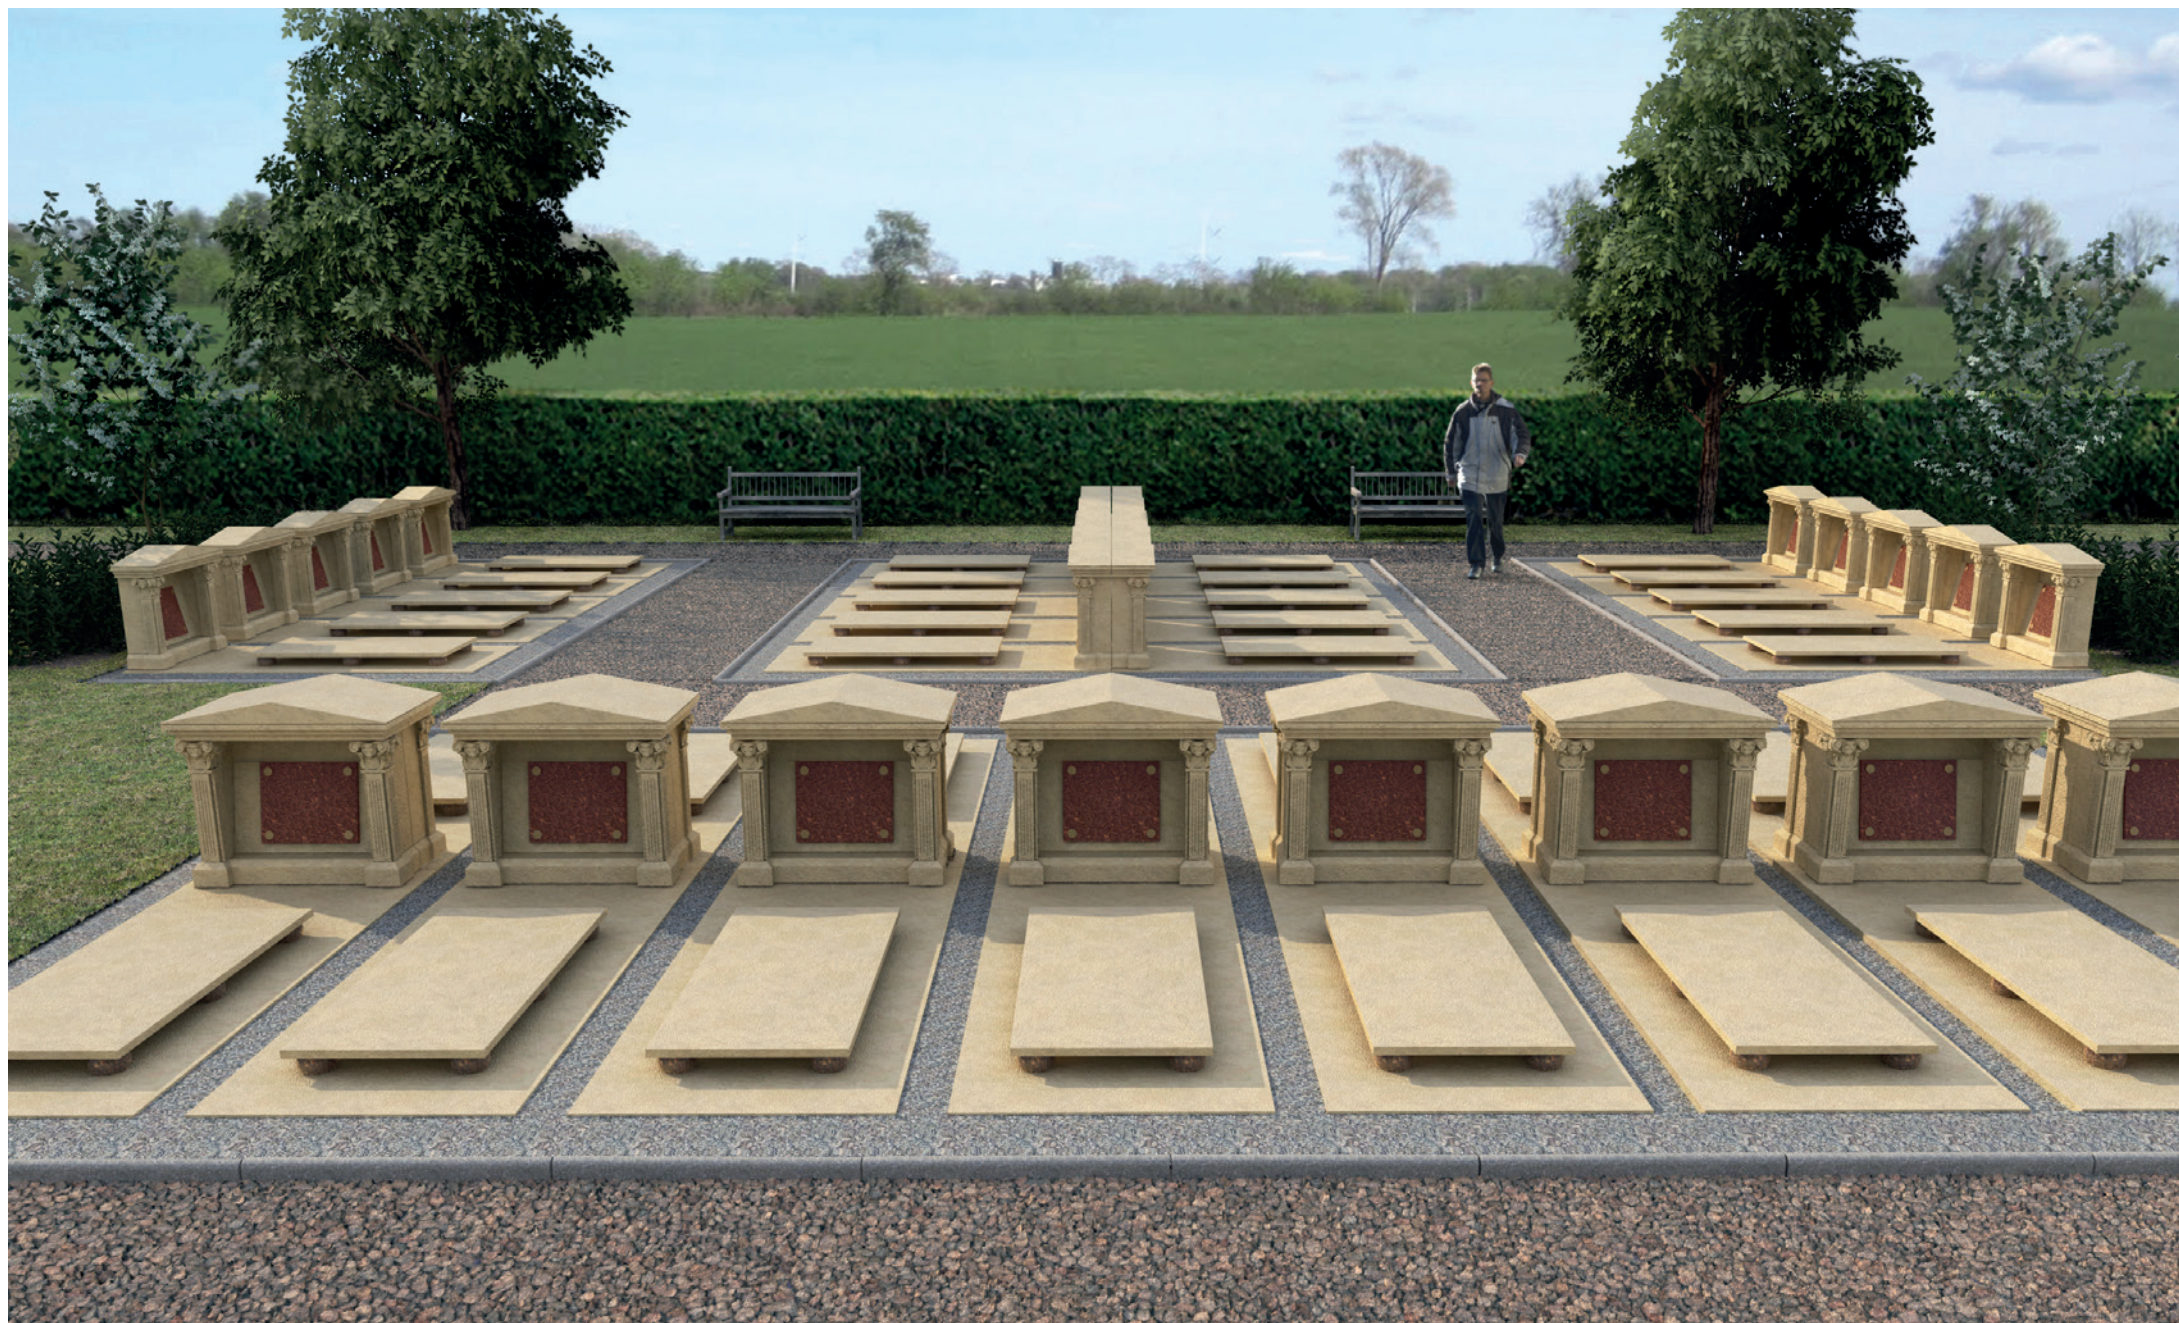

and hand carvings in abundance, The Buckingham is undoubtedly the connoisseur product in our range – and probably the world – available today. The carefully placed windows have been elegantly designed and placed to let in the maximum amount of natural daylight, the attention to detail is unrivalled.

The grandeur of the crafted granite steps that lead up to entrance makes a bold statement – the two outside walls on each side have been styled for family inscriptions.

The result of an uncompromising approach to design and craftsmanship, it has been styled to perfection. The immaculate detail and high-quality finish that goes into the construction of The Buckingham can only be achieved by skill and dedication.

The Buckingham can be personalised to meet the individual requirements.

{ABOUT US}

Creative Designs

WITH MORE THAN 25 YEARS EXPERIENCE of working on many prestigious projects in the private, commercial and public sector of the Industry we have built up an excellent reputation for providing innovative and creative designs.

We do not work from stock plans – every design is unique and created by skilled draughtsmen taking great care to fulfil every client brief. Our ethos is to provide cost effective and functional solutions whatever the build or project. With our creative

{ABOUT US}

Virtual 3D Designs

TO ASSIST senior executives in making key revenue-making decisions at board level, we can create state-of-the-art virtual 3D flyovers and aerial walk around of our cemetery designs, all created to scale.

EH Group® has developed a three-dimensional programme that enables it to produce a moving flyover of any proposed project.

{ABOUT US}

Topographical Surveys

A **COMPREHENSIVE** topographical land survey is essential to any project that you are considering and could reduce the possibility of costly mistakes or unforeseen issues.

Following our brief from our client we will undertake a topographical survey to gather data and understand the natural contours and features of the land.

Our experienced land surveyors using the very latest surveying equipment will collect, process and present the topographical information efficiently and accurately.

The data gathered will enable our experienced surveyors to make detail plans to maximise the burial spaces and revenue potential from the land surveyed.

{SERVICES}

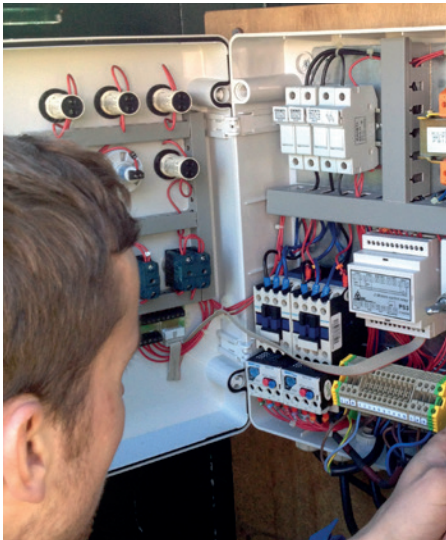

Environmental impact

THE VERY NATURE of our work means that there is great potential for negative impacts like fragmentation of habitats, direct species loss or disturbing wildlife which is why we always take an informed and positive approach to the environment on each and every project we take on.

Energy efficiency and reducing carbon footprint is also high on our list of priorities when designing, constructing and renovating buildings.

We are committed to using renewable materials wherever possible in every project we undertake. We will always address environmental concerns, raising awareness and taking positive actions to reduce any negative impact to the environment.

By carefully understanding the balance between architecture, landscape and the sensitivities of each projects requirement, we are able to protect the natural character of each and every site.

{SERVICES}

Maintenance

WE HAVE HELPED CLIENTS renovate and refurbish commercial buildings of all sizes and complexity and have extensive experience working

on listed buildings and overcoming the problems they present.

KEY AREAS

- › Building contracts
- › Property preservation
- › New builds
- › Listed buildings
- › All types of restoration work
- › Ground maintenance
- › Drainage and groundworks
- › Ponds – construction and maintenance
- › Landscaping

The company is well established as being outstanding in the completion of its

refurbishment and maintenance contracts. We are always considerate of the care and understanding needed when working on every type of project.

If it's a roof that needs attention or a building that needs a complete overhaul or transformation then we have all of the skills and experience to make any project a reality.

{SERVICES}

Landscaping

FOR THE PAST 15 YEARS EH Group® have undertaken commercial landscaping projects for some of the leading cemeteries and crematoriums in the UK having established an excellent working relationship with our clients.

SERVICES

SCOTLAND

Complex drainage
work to established
rose gardens

NORFOLK

Reclaiming unusable, flooded land and installing a drainage and pumping system to create new memorial gardens

{SERVICES} Drainage

WE HAVE SPECIALISED in solving complex drainage problems for more than 25 years, having been at the forefront of our competitors, coming up with ground breaking and innovative solutions.

Before we start work we will carry out a full inspection so we can design a drainage system which will work given the particular soil condition, the underlying soil and the location of the site. Once our site survey is complete, and only then, we will undertake a topographical survey and soil survey to assess the drainage system required.

Our skilled engineers are also trained in the installation of black water and grey water filtration systems and capable of taking on even the most difficult of projects.

FROM PROBLEM TO SOLUTION

TO DATE WE HAVE supplied and fitted more than 100 pumping stations across the UK, all of which are maintained regularly by our experienced teams.

EH Group® is one of the largest Cemetery Facilities Management Companies in the UK. With offices in London, Manchester and Norwich, our emergency response times are typically less than two hours.

In some parts of the UK there is a distinct shortage of burial space and because of the cultural diversity, demand for burials is growing all the time so reclaiming waterlogged land to create new burial areas is one key solution to this problem.

As leading specialists in drainage, you can be assured we will come up with a cost effective solution whatever the problem every time. To speak to one of our land drainage experts contact us today on **0207 5448583** or email us at **karl.hess@eh-group.co.uk**

{SERVICES}

CCTV Surveys

EH GROUP® ARE SPECIALISTS in carrying out commercial CCTV drain surveys and have extensive experience in solving complex drainage problems.

All of our operators are highly trained in the use of CCTV drain survey equipment. In the first instance, our specialist inspection crews expertly check the integrity of manholes and look for indications of pipeline problems looking for slow flowing mains, evidence of structural deterioration or the presence of grease, roots or debris. If a pipeline shows evidence of structural deterioration, or if the extent of potential problems cannot be determined by a physical inspection, a video inspection may be needed.

Once we have established the problem from the video footage our experience crew can decide the best way to tackle the problem. Once the work is complete, a CCTV drain survey is used again to ensure the pipeline has been returned to working order.

{SERVICES}

Electrical Installations

DESIGN AND INSTALLATION of electrical equipment and systems has been a major part of our business for the past 15 years. Like every project the EH Group®

undertakes we pride ourselves on the quality and standard of our workmanship.

SERVICES

- › Groundworks
- › Drainage
- › Fencing and walls
- › Driveways, paving and stonework
- › Paths and car park construction
- › Statues and ornaments
- › Trees and planting
- › Top soiling
- › Turfing
- › Ponds, lakes and fountains

Initial advice and quotations are provided free without obligation

We have extensive experience in carrying out electrical works on any size of commercial project from small rewires to designing and installing lighting and electrical power systems for cemeteries and crematoria across the UK.

With our commercial experience and expertise, we can advise you on the design and installation of a wide range of electrical systems.

{SERVICES}

Land Reclamation

IF YOU ARE CONSIDERING creating a new area of cemetery on a completely new site or maybe an extension to an existing cemetery onto a 'new' site then EH Group® can work with you to realise this goal and ensure that you make the most out of the opportunities that the site affords.

SERVICES

- › Ground conditions
- › Eco analysis of flora and fauna
- › Drainage impact of the proposal
- › Site screening
- › Traffic generation (if applicable)
- › Impact on the immediate locality (if applicable)
- › The need to add or remove soil to the site

The site would be accurately measured and our scheme would be presented as a softline sketch. This would show the numbers that could be achieved in each of the selected burial methods, albeit below ground crypts, vaults, mausoleums, memorial gardens or charnels.

Planning and mapping is a vital stage in the development process as it allows an accurate assessment to be made of the new burial site that can be created on the site.

Before any land can be reclaimed the ground conditions need to be carefully analysed to assess the need for possible dewatering or decontamination. EH Group® are specialists in this field and after careful examination and testing of the land, our expert design team will commence

with planning and mapping of the site to ensure the commercial value of the land is realised, planning for the maximum number of graves and memorials to meet the client's demands.

{ABOUT US}

Quality Is Important to Us

WE COMBINE THE FINEST MATERIALS built for both beauty and longevity, supported with the finest service in the industry to offer all our customers a superior experience.

Our confidence comes from our company ethos where we refuse to compromise on quality and only source the very best products from reputable manufacturers and suppliers. Our genuine passion for your work and relentless attention to detail at every stage of the project are essential markers of excellence.

We use the latest technologically advanced products that meet and exceed many British and European quality standards.

Each and every member of our team is highly skilled in their respective field and constantly undergoes rigorous and continuous on the job training to ensure they meet the supreme standards that our customers expect.

ISO

We have the following ISO accreditations

{ABOUT US}

Final Construction

OUR REPUTATION has been established by an uncompromising approach to quality and craftsmanship. With experience, expertise and enthusiasm, we have completed hundreds of projects that have breathed new life into old buildings, turned wasteland into beautiful and practical areas of peace and tranquillity and created useful new concepts out of disused buildings.

We can provide a full design and build service from concept to completion or will build your project from an already sourced design.

With a strong reputation for quality, professionalism, knowledge and experience, EH Group® offers an unrivalled service providing cost effective solutions to all projects without compromising on quality or design.

Our team is made up of highly skilled tradesmen who are specialists in their chosen field, every one chosen for the quality of their work and their customer care skills.

When EH Group® undertakes a project, you work with one company; the entire job is handled by us, from initial concept through to final completion.

{CASE STUDY}

Beckenham Memorial Gardens

EH GROUP® WAS CALLED IN to look at a site in Beckenham where the existing memorial gardens had been built on unstable ground and subsequently they had started to subside and sink.

After surveying the site EH Group® devised a plan to install a new foundation suitable for the ground conditions which involved completely rebuilding the memorial gardens. The project threw up a number of technical challenges as the building work was in the middle of a memorial area in close proximity to ash interments that could not be disturbed.

From initial inspection the project took nine weeks to complete and was handed back on time and within budget with EH Group® having restored the memorial gardens back to their former glory.

WHAT THE CLIENT HAD TO SAY

"I had the pleasure of working with Karl and his team on an underground burial chamber project at one of our cemeteries in Lambeth. I'm not sure how best to describe EH Group® – they were flipping marvellous!

Their product is (in my opinion) a market leader in terms of quality. The burial chambers

look good, but it's what you don't see that is remarkable – the quality of concrete/ reinforcement and drainage system were really important things for me on this project and Karl and his team were really good at being able to satisfy our requirements.

During the construction phase of the scheme I have not seen a contractor so committed to their method statement

and health and safety – the site they kept was immaculate I don't believe we got a single complaint in the cemetery and that is not an easy thing to achieve. At the end of the project they handed site back to me – I was basically shocked at how good it looked!

Brilliant work and most importantly – thanks for listening to the client."

STEVE WONG
Partner at Parose Projects Ltd

{CASE STUDY}

Lambeth District Council

EH GROUP® WERE ASKED to devise a scheme to increase the number of cast chamber burial spaces utilising green open space in the north west quadrant of Lambeth cemetery.

The brief required adapting a sympathetic approach with the existing burial chambers and a design which was consistent with the existing burial chambers yet at the same time optimising the area of land to maximise the number of new burial chambers.

The final design submitted by EH Group® created 47 new burial chambers and work commenced in started in late September 2015. The completed project was handed back to Lambeth District Council in December 2015 ahead of time and on budget.

{CASE STUDY}

Beckenham Cemetery

THE EH GROUP® BRIEF was to survey the site to allocate an area for much needed burial space.

EH Group® surveyed (topographically) an area of the site deemed un-useable due to the gradient. A 3D scheme was drawn up and, after three minor changes, a new burial area was born. This area created 570 new burial plots.

To address the sloped area, EH Group®'s structural engineers designed a concrete retaining wall structure specifically with the burial depth in mind. The EH Group® retaining sections not only provided structural support for the new terrace design but also made provisions for burials right up to the retaining wall. Thus through our design, all areas were used, maximising the number of burial spaces.

{CASE STUDY}

Rotherham Muslim Cemetery

EH GROUP® was contacted by the site's management and Muslim committee members to present a solution to the existing crypts installed by a separate contractor. The brief was simple: address the structural problems with the existing crypts and deal with the drainage issues surrounding them.

Following several meetings with the Muslim committee members in which they raised their dismay and concerns to surface and ground water above, around and in the crypts, and the structural issues of existing crypts i.e. cracking etc, The EH Group® brief was to find and design a solution for this problem. This was successfully achieved, with the construction of 50 crypts, all of which have been sold, with no issues or problems with water, structural, exhumation and/or relocation.

{CASE STUDY}

Streatham Vale Cemetery

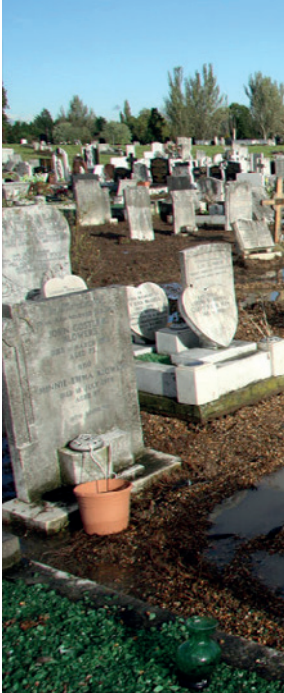

EH GROUP®'S BRIEF was to survey the site to allocate an area for much needed burial space. EH Group® surveyed (topographically) a disused area of the site utilised as a dumping ground deemed un-usable due to the location of common graves and over 1,000 tonnes of spoil, concrete and 40 years of general cemetery waste material.

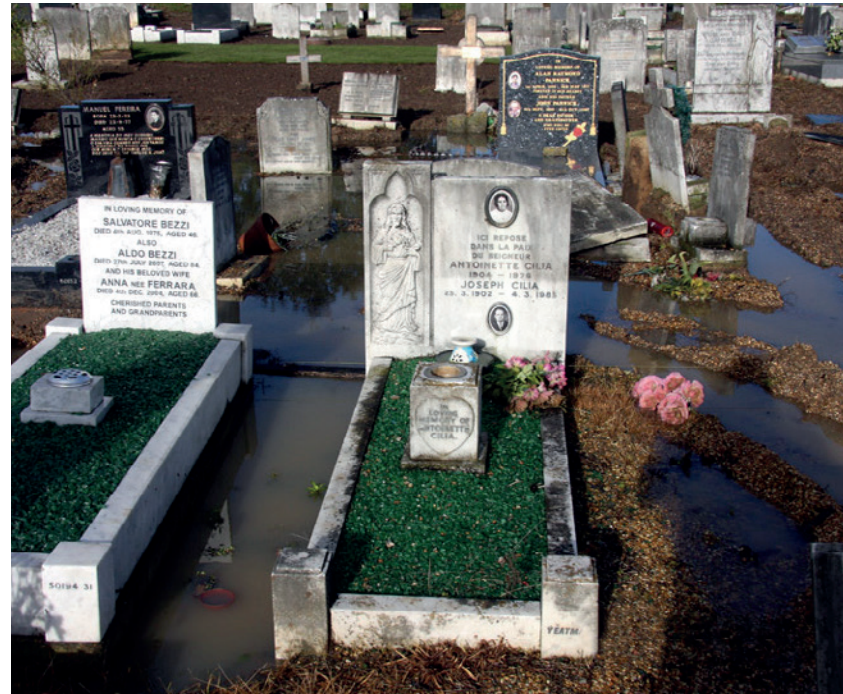

EH Group® designed a scheme to include both granite vaults and burial plots. The logistics of removing over 1,000 tonnes of spoil, waste materials through a built up area were very challenging.

The chosen location is a raised area approximately 9 meters above the surrounding area. Access for heavy lorries and equipment was not available through the site entrance/service road. EH Group® created a logistic solution by removing the boundary wall located to the rear of the cemetery and constructing a temporary ramp some 9 meters high. Access for all lorries were through the small opening and up to the raised ramp area. Due to the location, access was limited to only 5 hours per day. Moving 4,000 tonnes through a small access with limited time and no parking area for up to 20 lorries per day was quite a task.

The area was successfully handed over, complete with 640 burial plots and 80 granite vaults.

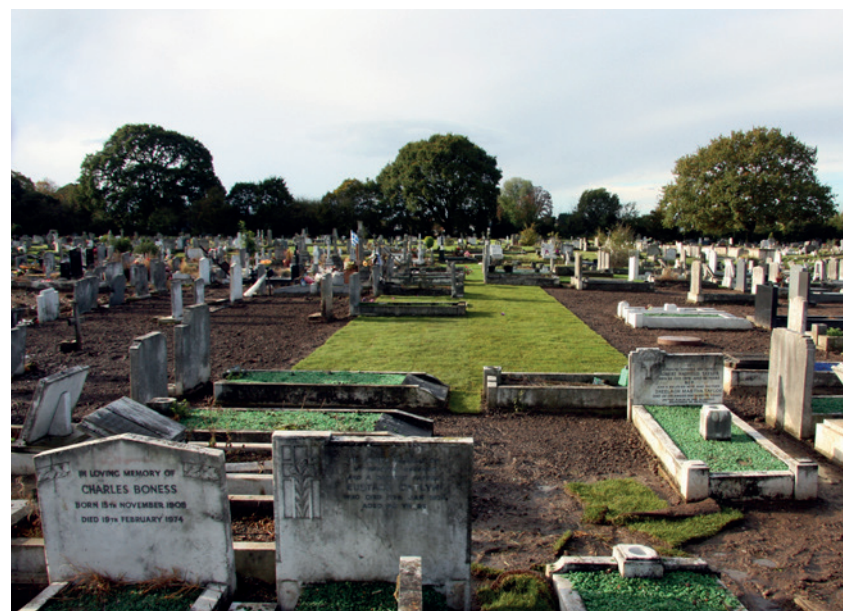

{CASE STUDY}

Streatham Vale Cemetery

FLOODED GRAVE AREA

EH GROUP® WAS CONTACTED to investigate a flooded area approximately a quarter of an acre in size. Due to the insensitivity of burial plots, EH Group® was unable to install a conventional drainage system. Therefore a scheme was devised to raise over 300 headstones complete with landings to create a gradient from the middle point of the plot directing water to the surrounding paths. Over 100 tonnes of soil was imported to site, the entire area was surveyed, headstones and landings were plotted and recorded. They were raised, soil was installed creating the new gradient, they were re-laid in their exact position upon completion of the gradient. Top quality turf was laid to the newly raised area.

Drainage was then installed in the path to take the surface water. This was directed into a newly installed EH Group® pumping station to be pumped away from the area.

{CASE STUDY}

Retaining Wall Schemes

EH GROUP® specialise in raising existing ground levels to create new burial areas within the cemetery industry. We have successfully installed EH Group® retaining wall sections on a number of cemetery located in the London areas. The sections are designed to be installed with double depth internment in mind.

This allows the ground level to be raised to the desired measurement and inter tight to the wall with no disturbance to the wall foundations. This is especially important because it ensures revenue and burial spaces are not lost.

{CASE STUDY}

Central London Crematorium

ROAD REMOVAL

ON THIS PROJECT EH Group® were commissioned to remove a service road and provide additional burial space.

The road was demolished by a 25 tonne EH Group® excavator and all concrete and rubble removed from the site. The concrete from the road was crushed, screened and reused in numerous EH Group® projects, reducing the carbon footprint.

EH Group® undertook the logistical task of removing hundreds of tonnes of concrete through an operational and busy site. This was achieved by undertaking the task out of hours.

The mapping carried out by EH Group® enabled the final design to maximise the number of burial spaces to create the maximum revenue from the land space. A DDA path was incorporated within the plans to address a pedestrian walkway and create pathside graves. Screened top soil was imported to replace the reduced levels left by the concrete; this was leveled and seeded with grass seed.

{CASE STUDY}

Tottenham Grave Scheme

AFTER CAREFULLY SURVEYING a vast area over run with wild trees and dense undergrowth EH Group® set to work to clear the site using specialist equipment.

A scheme was then designed to create over 200 new casket size burial spaces which included headstone landings on the previously unusable land. Clearing the site was a major challenge but with EH Group® specialist equipment the site was cleared just one week.

There were a number of sensitive conservation issues with this project which required EH Group® to work in consultation with both local conservation officers and the client to reach agreement to provide a two phased new tree planting scheme.

The project was completed in just 12 weeks.

{CONTACT US}

EHGROUP®
CREATING LEGACIES

OUR HEAD OFFICE is based in Central London and we also have offices in Manchester and Norwich, enabling us to service our extensive client base across the UK.

EH Group® response time to an emergency call out is typically less than 2.5 hours anywhere in the UK.

Our company is accredited with ISO 18001, 9001 and 14001 in recognition of quality work and concern for the environment. We are also registered members of National Association of Memorial Masons.

The EH Group® has grown through building strong, long-standing relationships with clients who value our workmanship, reliability and our attention to detail and we have developed a reputation for delivering high quality projects on time and to budget.
